

UNMH Certified Nurse-Midwife (CNM) Clinical Privileges

Name: _____ Effective Dates: From _____ To _____

All new applicants must meet the following requirements as approved by the UNMH Board of Trustees, effective January 27, 2017:

INSTRUCTIONS:

Applicant: Check off the “requested” box for each privilege requested. Applicants have the burden of producing information deemed adequate by the Hospital for a proper evaluation of current competence, current clinical activity, and other qualifications and for resolving any doubts related to qualifications for requested privileges.

Department Chair: Check the appropriate box for recommendation on the last page of this form. If recommended with conditions or not recommended, provide condition or explanation.

OTHER REQUIREMENTS:

1. Note that privileges granted may only be exercised at UNM Hospitals and clinics that have the appropriate equipment, license, beds, staff, and other support required to provide the services defined in this document. Site-specific services may be defined in hospital or department policy.
2. This document defines qualifications to exercise clinical privileges. The applicant must also adhere to any additional organizational, regulatory, or accreditation requirements that the organization is obligated to meet.

POLICIES GOVERNING CLINICAL PRIVILEGES

1. Affiliation with Medical Staff Appointee:

- a. A CNM may practice within a clinical department. The CNM will practice within clinical practice guidelines approved by the clinical department chair/director.
- b. All services shall be performed in a manner consistent with Medical Staff Bylaws, Medical Staff Rules and Regulations, and Hospital policies and procedures.
- c. Midwifery practice is the management of women’s healthcare, focusing on pregnancy, childbirth, the postpartum period, care of the newborn, and the family planning and gynecological needs of women. The certified nurse-midwife (CNM) practices within a healthcare system that provides for consultation, collaborative management or referral as indicated by the health status of the client. CNMs support women as partners in healthcare choices and practice in accordance with the current Standards for the Practice of Nurse-Midwifery as defined by the American College of Nurse-Midwives.
- d. Midwifery care is primarily intended for healthy women. However, when women experience medical, gynecological and/or obstetrical complications, the CNM can continue to be instrumental in their care. This *collaboration (co-management) provides for the following patterns of care for the high risk client:

UNMH Certified Nurse-Midwife (CNM) Clinical Privileges

Name: _____ Effective Dates: From _____ To _____

- i. Consultation is the process whereby a CNM who maintains primary management responsibility for the woman's care seeks the advice or opinion of a physician or another member of the healthcare team.
- ii. Collaboration is the process whereby a CNM and physician jointly manage the care of a woman or newborn who has become medically, gynecologically, or obstetrically complicated. The scope of collaboration may encompass the physical care of the client, including delivery, by the CNM, according to a mutually agreed-upon plan of care. When the physician must assume a dominant role in the care of the client due to increased risk status, the CNM may continue to participate in physical care, counseling, guidance, teaching, and support. Effective communication between the CNM and physician is essential for ongoing collaborative management.
- iii. Referral is the process by which the CNM directs the client to a physician or another healthcare professional for management of a particular problem or aspect of the client's care.

**ACNM position statement – Collaborative Management in Midwifery Practice for Medical, Gynecological and Obstetrical Conditions; August 1997*

2. Coverage of Obstetrical Cases:

- a. When a midwifery patient is referred to, or presents in, the emergency room or in labor for delivery, the CNM will be contacted according to the established procedures and informed of the patient's condition.
- b. A CNM will practice according to clinical practice guidelines as adopted by their clinical department.

QUALIFICATIONS FOR CERTIFIED NURSE MIDWIFE (CNM)

Initial Privileges: To be eligible to apply for privileges as a certified nurse midwife, the applicant must meet the following criteria:

1. Current active licensure to practice in the nurse midwife category in the State of New Mexico;
AND
2. Current active certification by the American Midwifery Certification Board (or its predecessor, the American College of Nurse Midwives Certification Council), or be actively seeking initial certification and obtain same on the first examination for which he/she is eligible; **AND**
3. Required previous experience: Applicants for initial appointment must be able to demonstrate current intrapartum competence when requesting inpatient privileges only.

Renewal of Privileges: To be eligible to renew privileges as a certified nurse midwife, the applicant must demonstrate current competence and an adequate volume of experience with acceptable results in the privileges requested for the past twenty-four (24) months based on results of quality assessment/improvement activities and outcomes. Evidence of current ability to perform privileges requested is required of all applicants for renewal of clinical privileges.
